

updated. Plus, *DMM* software lets you build more complex queries based on the results of simpler queries.

The *DMM* package also puts the power of presentation into your hands, giving you full drill-down capability in all of your pivot tables, charts, data tables, and reports as well as the ability to easily import and export several different data types. It also allows you to create Microsoft® Windows®-based Executive Information Summary (EIS) screens, which provide other users in your organization the ability to run and access queries with the simple click of a button.

Finally, the *DMM* product saves your resources. Because *DMM* software fully integrates with *IGS* software, you can schedule the *DMM* database to automatically receive daily data updates from the *IGS* software, thereby eliminating the impact on production servers during query and report generation.

The electrifying *DMM* solution – jolting dull data back to life!

New EZ Pay™ System Enhancements Powered by the SAS™ 6.0 Standard

Using the new SAS 6.0 protocol recently accepted as a Gaming Standards Association standard specification, IGT is demonstrating the following *EZ Pay* 1.5 Ticket System features at G2E:

- *QuikPlay* ATM – Swipe a debit card at the machine to transfer approved funds as playable credits or a cashout ticket
- Promotional Tickets – Send out tickets loaded with promotional credits to bring select players into your casino

The PTTV Player Tracking Panel

Incorporating the latest in multimedia technology to display player and game activity, the *PTTV* Player Tracking Panel will be offered as an interface to the existing *IGS* product, as well as future products developed by *IGT Gaming Systems*. The *PTTV* panel includes a 3.5” full-color LCD display with sound, surrounded by a unique LED-lit color-coded bezel that instantly displays player status. This cutting-edge technology will allow casinos to present streaming media and advertising to patrons, and provides player interaction with casino staff via the LCD, lighted bezel, and a four-button interface. The *IGS* solution combined with the *PTTV* panel enables casino personnel to increase customer service by being more responsive to guests and their requests. Let IGT show you the future of player tracking systems with the *PTTV* Player Tracking Panel.

Get to Know the Systems Interface

Extra! Extra! Read all about it! *IGT Gaming Systems* introduces *Systems Interface*, the first newsletter from IGT dedicated to our many innovative systems products and services!

Published throughout the year, each issue reports on the most current *IGT Gaming Systems* products, as well as those in development to keep you informed about the hottest systems technology in the field today!

Systems Interface includes current events and trends such as new training classes, gaming shows, and survey results. Our “Hot Properties” section will explore our various systems installation successes, sharing how *IGT Gaming Systems* products have improved customer operations and helped increase profitability at some of the most reputable casinos in the industry.

Pick up the inaugural issue of *Systems Interface* today or contact your *IGT Gaming Systems* Account Executive, or visit www.IGT.com for your free copy.
