

# TRAINING AND HUMAN RESOURCES

## IGT University® Training!

Invest in your casino's future with *IGT University* courses. Our training program enables you to lower the amount of time it takes to bring an inexperienced technician to the point where they are self-sufficient on the casino floor.

*IGT University* classes allow technicians to learn directly from the manufacturer, and to get the same training as IGT technicians.

When a product line changes, we immediately update our course content.

Technicians have one-on-one access to an IGT trainer who has the latest information.

Classes are available year-round at our training sites, or we'll bring the complete training experience - machines and all - to you.

For more information, call 775-448-8308, or visit us on the Web at [www.igttraining.com](http://www.igttraining.com).

Stop by the *IGT University* table in our booth and receive a special discount on training!
